NET - Information note regarding discontinuance of prior approval as packaging tester

The Norwegian Civil Aviation Authority (NCAA) – issued on request from The Nordic Packaging and Product Testing AS (NET) an approval as packaging tester for packaging used for transport of dangerous goods on aircrafts. This was back in 2010.

In 2013 NCAA had to nullify this approval when it became clear that the legal basis for granting such an approval was missing, and for that matter unnecessary. The nullification was not a result of any reprehensible conditions at NET, but purely a rectification of a legal error made by NCAA. NET holds all necessary accreditations provided by Norsk Akkreditering.

The ICAO Technical Instruction only establishes requirements for how to perform tests. NET performs tests of dangerous goods packaging according to UN specifications as required in ICAO Technical Instruction through an accredited laboratory (ISO 17025).

Yours sincerely

Marianne Kirkesæther
